

# PROFESSIONAL SERVICES

## SmartOptimize

The only certainty in network security is change. Nothing is static; threats and your response to them change constantly. Over time, the constant changes required to maintain network security can negatively impact the performance of your network, expose you to security breaches and increase the operational overhead of managing your security policy.

**CHECK POINT**  
**PROFESSIONAL SERVICES**  
 Consult • Design • Deploy • Operate • Optimize

**Boost the performance and security defenses of your network with advanced optimization services and health checks.**

### SmartOptimize

- Faster policy installation times

### Product Features

- Detailed reports
- Recommendations provided by expert Professional Services Consultants
- Rulebase Optimization
- Database Optimization
- System Health
- Risk analysis
- In-depth hit count analysis
- Optional onsite services

## SOLUTION

SmartOptimize was developed in response to customer requests and uses Check Point best practices with the accumulated experience from thousands of Professional Services engagements across the globe as the baseline.

This powerful security optimization service is designed to specifically review and assess the security posture, management performance, resource utilization, and operational efficiency, among others by cleaning up legacy and unused object, merging like for like rules and optimizing your policy for best performance.

The report includes comments by a Professional Services Consultant with recommendations on remediation of identified issues, patching levels, and improving security posture.

## HOW IT WORKS

Professional Services Consultant provides you with a lightweight utility to collect the required security configuration that can be uploaded to the Check Point secure server. The consultant uses internal tools to analyze the configuration and collected data, and the reports are generated. The Consultant then uses their expertise and experience to make further investigations and provide customized recommendations on the environment.

## SAMPLE REPORTS
