PRODUCT UPGRADE PROGRAM

The key to maximizing ROI on your Check Point products is to get them up and running, quickly and efficiently. The Check Point Product Upgrade Program is designed to make this as easy as possible. Though Check Point products are designed to be easy to use, company in-house resources may not have the necessary skills or availability to upgrade and could benefit from direct assistance before upgrading.

CHECK POINT
PROFESSIONAL SERVICES
Consult • Design • Deploy • Operate • Optimize

OUR SOLUTION

Check Point Professional Services offers the timesaving Product Upgrade Program to help companies quickly upgrade all current Check Point products and provides the skill set and resources necessary to realize an immediate ROI. Check Point Professional Services provides configuration, testing, implementation and monitoring services for the best possible product upgrades.

SERVICE FEATURES

- Upgrade infrastructure
- Testing and validation
- Roll back
- On-site consulting
- Monitoring
- Sign off report

SERVICE BENEFITS

- Shortens upgrade timeframe
- Reduces upgrade downtime
- Provides faster ROI

SERVICE FEATURES

Upgrade Planning

Planning is critical for success. Professional Services consultants will determine the best path for each customer's situation from several upgrade choices. After designing the best platform architecture, Professional Services consultant will create a high-level upgrade plan for previous-to-current versions of Check Point products.

Testing

Validation of upgrade procedure according to the plan in sanity tests, timing activity and roll back plan. The consultant will provide high-level instructions about restoring a system to its original configuration.

Execution

Check Point consultant will be present at the cutover window (with the partner/disti where applicable) to ensure timely and efficient upgrade according to plan.
