

## **CHECK POINT**

## **CERTIFIED SECURITY EXPERT** (CCSE)

#### **AUDIENCE**

Technical Professionals who architect, upgrade, maintain, and support Check Point products.

Learn advanced concepts and develop skills necessary to design, deploy, and upgrade Check Point Security environments.

#### **PREREQUISITES**

CCSA Training or Certification, fundamental Unix and Windows knowledge, certificate management experience, system administration and networking knowledge.

#### **TOPICS**

**Management Upgrade and Migration** 

Management High Availability Security Gateway Upgrades

Advanced Check Point Maintenance

Security Gateway Operations

Policy Installation

Gaia and Management APIs

Acceleration

Site-to-Site VPN

Remote Access VPN

**Mobile Access VPN** 

Clustering

**Advanced Logs and Monitoring** 

#### **OBJECTIVES**

- Provide an overview of the upgrade service and options available.
- Explain how to perform management upgrade and migration.
- Articulate the process using CPUSE features.
- Articulate the purpose and function of Management High Availability.
- Explain Primary vs Secondary, Active vs Standby and Synchronization.
- Explain disaster recovery steps in case the primary management server becomes unavailable.
- Provide overview of Central Deployment in SmartConsole.
- Articulate an understanding of Security Gateway cluster upgrade
- Explain about Multi Version Cluster (MVC) upgrades.
- Discuss Gaia Commands and how they are used.
- Explain the main processes on s and s.
- Describe how to work with scripts and SmartTasks to configure automatic actions.
- Explain the Management Data Plane Separation (MDPS)
- Explain kernel operations and traffic flow
- Articulate Dynamic and Updatable Objects in Security Gateways
- Explain the policy installation flow and files used.
- Describe the use of policy installation history.
- Explain concurrent and accelerated install policy.
- Describe an overview of APIs and ways to use and authenticate.
- Explain how to make changes in GAIA and management
- · Explain how to install policy using API.

- Explain how the SecureXL acceleration technology enhances and optimizes Security Gateway performance.
- Describe how the CoreXL acceleration technology enhances and improves Security Gateway performance.
- Articulate how utilizing multiple traffic queues can make traffic handling more efficient.
- Discuss Site-to-Site VPN basics, deployment and communities.
- Describe how to analyze and interpret VPN tunnel traffic.
- Explain Link Selection and ISP Redundancy options.
- Explain tunnel management features.
- Discuss Check Point Remote Access solutions and how they differ from each other
- Describe how client security can be provided by Remote Access.
- Explain authentication methods including machine authentication.
- Explain Multiple Entry Point (MEP).
- Discuss the Mobile Access Software Blade and how it secures communication and data exchange during remote connections.
- Describe Mobile Access deployment options.
- Discuss various features in Mobile Access like Portals, Link Translation, running Native Applications, Reverse Proxy and more.
- Explain basic concepts of Clustering and ClusterXL.
- Explain about Cluster Control Protocol (CCP) and synchronization.
- Describe advanced ClusterXL functions and modes like Load Sharing. Active-Active, VMAC mode etc.
- Discuss Cluster Correction Layer (CCL) to provide connection
- · Advanced Logs and Monitoring

## CHECK POINT

# CERTIFIED SECURITY EXPERT (CCSE)

### **Objectives (contd.)**

- Explain how to determine if the configuration is compliant with the best practices.
- Explain how to set action items to meet the compliance.
- Discuss how SmartEvent functions to identify critical security issues.
- Describe the components of SmartEvent and their deployment options.
- Discuss how SmartEvent can assist in reporting security threats.
- Explain how to customize event definitions and set an Event Policy.

#### **EXERCISES**

- Prepare for a Security Management Server Upgrade
- Upgrade the Security Management Server
- Deploy a Secondary Security Management Server
- Configure a Distributed Log Server
- Upgrade a Security Gateway from SmartConsole
- Work with the Command Line
- Use Scripts and SmartTasks
- Configure Dynamic Objects
- Monitor Traffic
- Verify Policy Installation and Status

- Work with Gaia and Management APIs
- Work with Acceleration Features
- Configure a Locally Managed Site to Site VPN
- Configure a Site to Site VPN with an Interoperable Device
- Configure Remote Access VPN
- Configure Mobile Access VPN
- Configure a High Availability Cluster
- Work with ClusterXL
- Configure Policy Compliance
- Deploy SmartEvent
