

Infrastructure Hacking

Get Certified Today!

2 DAY CLASS

FOUNDATION TRACK

Requirement: Bring a laptop with admin/root access

This curriculum familiarizes you with hacking tools and techniques.

- ⇒ Gain practical experience with tools that will serve you in the future
- ⇒ Learn tools and techniques to hack various components involved in infrastructure hacking
- ⇒ Develop critical understanding of the concepts behind these tools

You will have access to:

- State-of-the-art Hacklab with relevant tools and VMs
- Dedicated Kali VM to each attendee
- A hacking lab for 30 days after completion of the course. Scripts and tools are provided during the training, along with student hand-outs.

Requirements: Bring a laptop with admin/root access

Who should take this class?

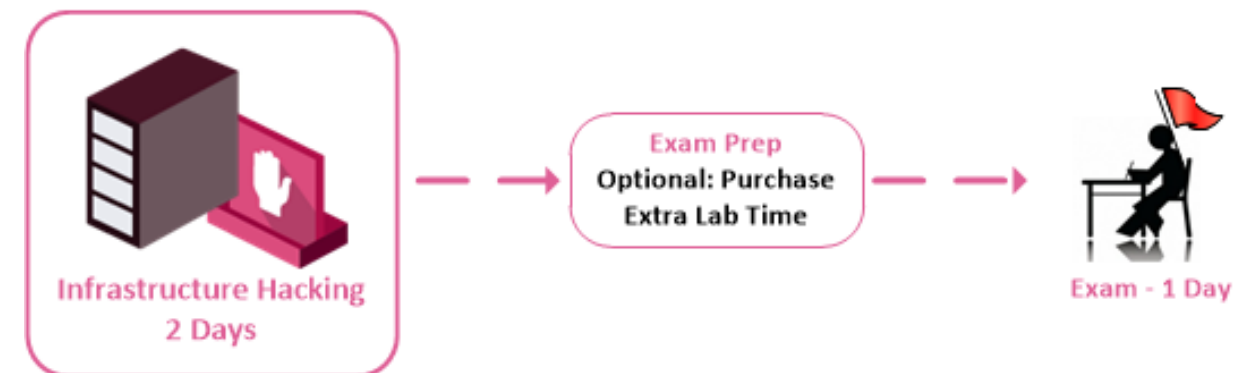

- System administrators
- SOC analysts
- Entry and Intermediate level penetration testers
- Network engineers
- Security enthusiasts
- Anyone who wants to take their skills to the next level

Day 1

- TCP/IP basics
- The art of Port Scanning
- Target enumeration
- Brute-forcing
- Metasploit basics
- Hacking recent Unix vulnerabilities
- Hacking databases
- Hacking application servers

Day 2

- Hacking third-party applications (WordPress, Joomla, Drupal)
- Windows enumeration
- Hacking recent Windows vulnerabilities
- Hacking third party software (Browser, PDF, Java)
- Post-exploitation: dumping secrets
- Hacking windows domains
