

Web Hacking

Get Certified Today!

2 DAY CLASS

FOUNDATION TRACK

This curriculum introduces you to Web Application Hacking.

- ⇒ Practical focus
- ⇒ Learn how web application security flaws are found
- ⇒ Discover leading industry standards and approaches
- ⇒ Use this foundation to enhance your knowledge
- ⇒ Prepare for more advanced web application topics

This is an entry level web application security testing course and we recommend it as a pre-requisite for the **Advanced Web Hacking course**. Tools and techniques will be taught in the 2-day course. If you would like to step into the world of ethical hacking / penetration testing with a focus on web applications, then this is the class for you.

Who should take this class?

- System administrators
- Web developers
- SOC analysts
- Penetration testers
- Network engineers
- Security enthusiasts
- Anyone who wants to take their skills to the next level

Web Hacking is the second part of the Art of Hacking Class.

Day 1

Information gathering, profiling and cross-site scripting

- Understand HTTP protocol
- Identify the attack surface
- Username enumeration
- Information disclosure
- Issues with SSL / TLS
- Cross-site scripting
- Cross-site request forgery

Day 2

Injection, flaws, files and hacks

- SQL injection
- XXE attacks
- OS code injection
- Local / remote file include
- Cryptographic weakness
- Business logic flaws
- Insecure file uploads
