Check Point 🎓

SECUREACADEMY™

JUMP START PROGRAM

More than 40k students and security professionals enjoyed the Check Point's Cyber Security Jump Start program, offering 20 hours of free eLearning courses and content, allowing users to expand their practical skills and boost their cybersecurity knowledge.

The courses cover topics from Network security to in-depth product technical training such as CloudGuard family, Threat prevention, Scalable platforms and Endpoint Security.

The program is designed for anyone looking for an opportunity to boost their Cybersecurity career and education.

The Check Point Jump Start program gives students the following learning experiences:

Network Security:

- Introduction to the Check Point Solution
- Deploying Check Point Security Management
- Deploying Check Point Security Gateways
- Creating a Security Policy
- Logs and Monitoring

Cloud Security

- Explore the CloudGuard solution, which provides cloud network security
- Posture management and cloud threat hunting
- Cloud application security, for the public cloud
