

SecureAcademy supports students of higher education institutes worldwide by providing them with vital Cyber Security skills and learning resources. We help students earn real-world experience in multiple fields of cyber security such as Cloud, Network and EndPoint.

The program is free of charge, as we aim to provide vital cybersecurity skills and learning resources in order to close the field's workforce gap.

There is a [shortfall](#) of almost 465,000 cybersecurity professionals in the United States. Globally, this number is [estimated to be](#) about 2.72 million.

We provide FREE content, licenses, support, and certifications to our Academic partners and their students.

SecureAcademy boasts with more than **100 academic partners**, **1,250 students**, and over **30,000 learning hours**.

We offer varied instructor-led and self-paced courses and tracks

[See all our learning paths and offerings](#)

At a high level:

- There is zero cost – we provide all of the course curriculum at no charge (\$3,200 value per certification per student if purchased)
 - We also provide professional training for your instructors at no cost
 - Licenses for lab software is included
- Students get an 85% discount on certification exams (normally \$250/exam; students can purchase the exam vouchers for \$37).
- Students will benefit from hands-on experience with our technology, and learn how to administer these solutions in the real world.
- Check Point will be happy to offer our technical experts to assist in the training as “guest speakers,” etc.
- As an added benefit, Check Point will refer students who finish the program to our internal recruiters as well as customers & partners who are seeking Check Point certified security professionals.
