

Microsoft Azure Sentinel

Cloud-native SIEM with built-in AI so security analysts can focus on what matters most.

Azure Sentinel is a cloud-native security information and event manager (SIEM) platform that uses built-in AI to help analyze large volumes of data across an enterprise—fast. Azure Sentinel aggregates data from all sources, including users, applications, servers, and devices running on-premises or in any cloud, letting you reason over millions of records in a few seconds. It includes built-in connectors for easy onboarding of popular security solutions. Collect data from any source with support for open standard formats like CEF and Syslog.

Collect data at cloud scale—across all users, devices, applications, and infrastructure, both on-premises and in multiple clouds.

Detect previously uncovered threats and minimize false positives using analytics and unparalleled threat intelligence from Microsoft.

Investigate threats with AI and hunt suspicious activities at scale, tapping into decades of cybersecurity work at Microsoft.

Respond to incidents rapidly with built-in orchestration and automation of common tasks.

Access all CloudGuard security information from your Azure, Azure Stack and hybrid cloud deployments in Microsoft Azure Sentinel

Check Point's CloudGuard for Microsoft Azure delivers advanced, multi-layered security for the Azure cloud environment, protecting assets in the cloud from attacks while enabling secure connectivity from enterprise networks to the Azure cloud.

The integration between CloudGuard and Sentinel allows you to seamlessly import CloudGuard network security information and events from your on-prem, Azure, Azure Stack and other hybrid clouds into Sentinel.

CUSTOMER BENEFITS

- Provides customers advanced threat protection for on premise and cloud environments from one-pane-of-glass
- Enables unified security management across Azure Cloud, Azure Stack and on premise workloads
- Encourages consistent security policy management, enforcement and reporting
