

# R81

## TOP 10 REASONS TO USE QUANTUM CYBER SECURITY PLATFORM

### 01 Highest Levels of Security With Autonomous Threat Prevention

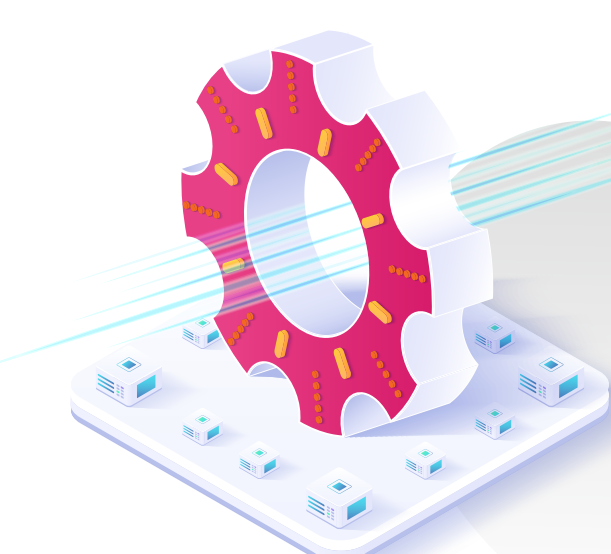

AI-driven security policy designed to prevent against zero day attacks

Implement best practices in a single click

Security Gateways are immediately configured

Policies are continuously and automatically updated

### 02 Rapid Response to Changing Security Needs With Fastest Policy Installation

02

Up to **90%**

Faster policy installation from minutes to seconds.

Upgrade multiple remote gateways in a click of a button

### 03 Automatic Security Performance

Automatically allocate hardware and core resources based on traffic characteristics

### 04 Optimal Security For Encrypted Network Traffic (SSL)

04

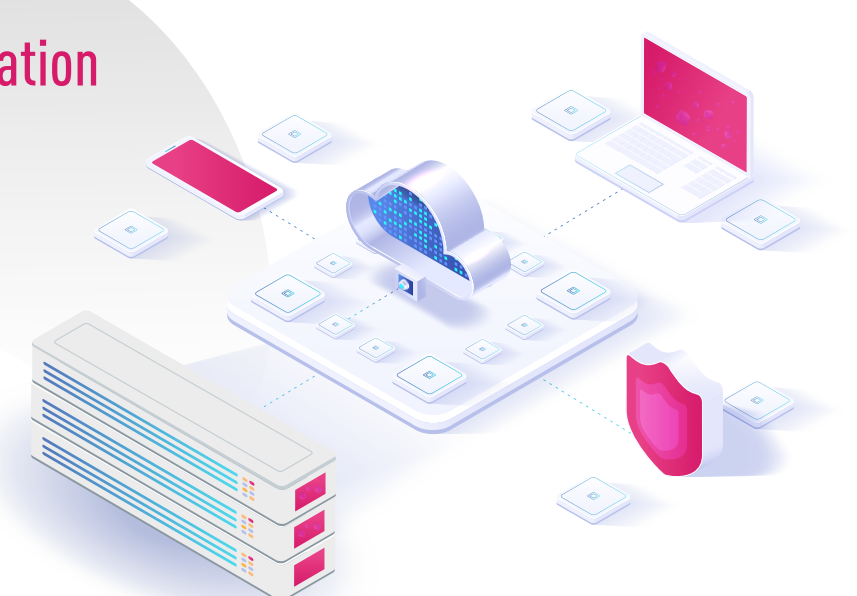

**Secure Connectivity:** Supporting the latest standards, including TLS 1.3 and HTTP/2

**Granular Control:** Dedicated policy layer to easily control the decision to inspect or bypass network traffic

### 05 Zero Touch Installation for New Security Gateways

No Need for an On-Site Technician

Plug it in, Turn it on, and You're Protected against Gen V cyber attacks

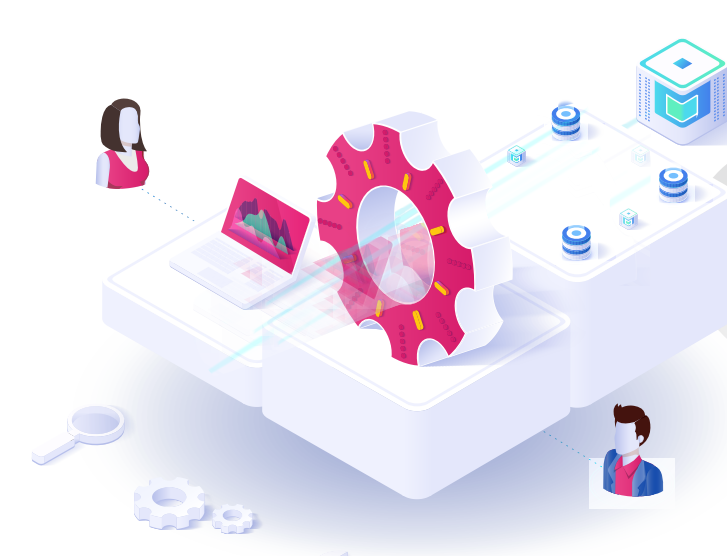

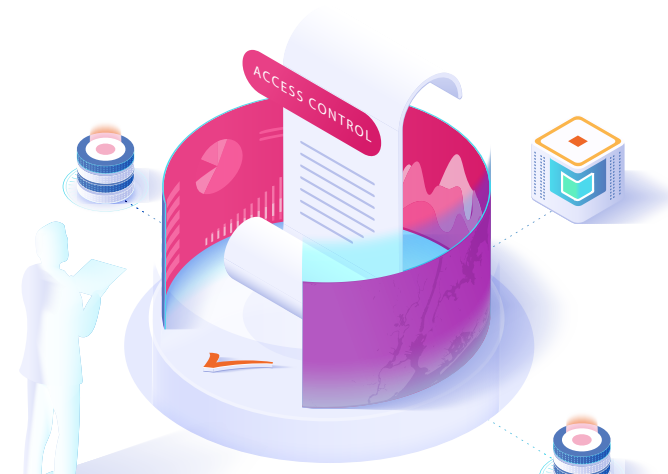

### 06 Seamless Deployment and Scalability for Superior Network Security Management

06

R81 cyber security management platform can be deployed via virtual appliances, Quantum Smart-1 purpose built appliances; or as a cloud service via the Quantum Smart-1 Cloud platform with zero maintenance and unlimited support for more gateways and storage

### 07 Consolidated Traffic Monitoring And Improved Indexing Capabilities With Custom Intelligence Feeds

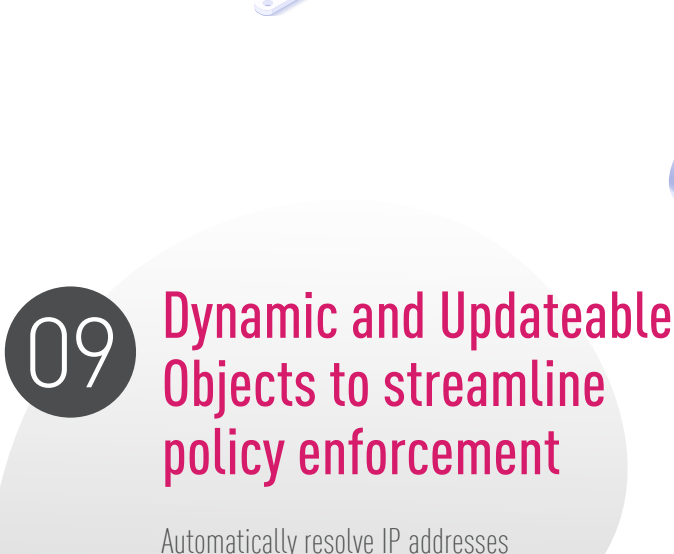

Respond to Threats Quickly with the Best Event & Log Management

### 08 Concurrent Admin Sessions and Multi Install Policy Sessions

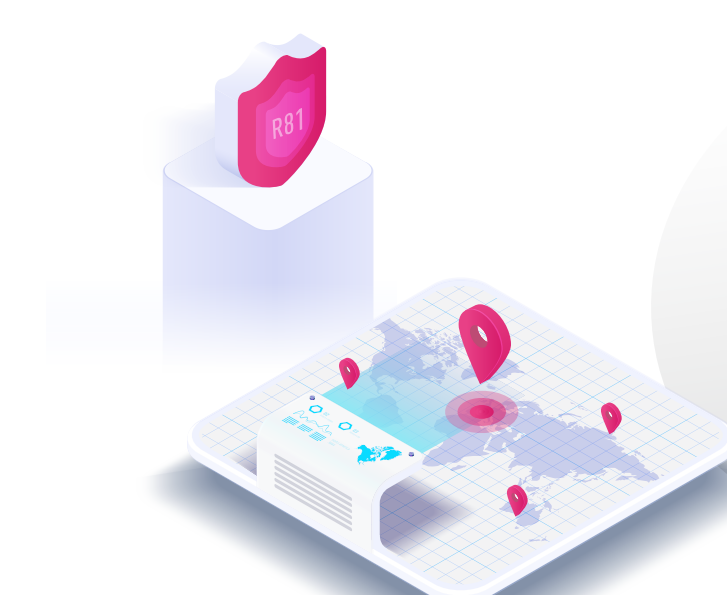

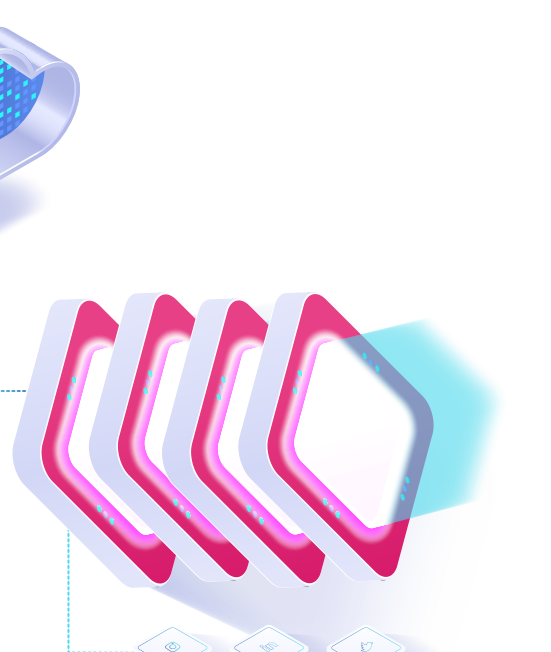

08

Create safe workflows and allow multiple administrators to work simultaneously on the same policy without conflicts

### 09 Dynamic and Updateable Objects to streamline policy enforcement

Automatically resolve IP addresses of countries and most common SaaS services and apps to increase policy management efficiency

### 10 Single Console, Unified Policy

10

Manage all network and threat prevention security aspects across the enterprise with intuitive policy segmentation capabilities
