"As we work to create new features and functionalities the R&D team is able to work with third party or us directly to help find quick solves. Having that immediate contact with Check Point really is a life saver."

- Greg Smith, Director of Cyber Security , Hallmark

Challenge

- Deploy multiple security gateways across several regions within different cloud environments.
- Scale security dynamically
- Develop and enhance new software products securely under tight timelines

Solutions

- Check Point CloudGuard Network security

Benefits

- Able to produce a product in a secure manner
- Enjoy East-West , North-South and Egress traffic protection in the cloud
- Gained dynamic security elasticity to ensure capacity when and where needed.
