DELIVERING

NETWORK-SPEED FIREWALL SECURITY

Top 5 reasons to choose the new hyper-fast security gateways series from Check Point.

---

1 LIGHTNING FAST

5x Increase in secure high-speed data transfers

USE CASE:

Accelerate Data Center Access

Legacy solution
145 Gbps

QUANTUM LIGHTSPEED
800 Gbps

---

2 ULTRA-LOW LATENCY

10x Performance boost for trusted app transactions

USE CASE:

Protect high frequency financial transaction apps:

Legacy solution
30 microsecs

QUANTUM LIGHTSPEED
3 microsecs

---

3 SECURE SCALABILITY

UP TO **20x** Increase in raw firewall throughput

USE CASE:

Enable hyper growth with Check Point Maestro Hyperscale:

Legacy solution (no Maestro)
145 Gbps line rate

QUANTUM LIGHTSPEED + Maestro
3 Tbps line rate

---

4 POWERED BY NVIDIA

NVIDIA® Innovative ASIC technology developed with Check Point

KEY FEATURES:

Highest security with hyper-accelerated packet throughput

Using ASIC-based NVIDIA packet processing technology

Achieves line-rate firewall speeds by offloading firewall stateful inspection processing

---

5 UNBEATABLE VALUE

20x Price performance

KEY FEATURES:

Redefines security price performance: Unprecedented network speeds and throughput

Cost-saving lower rackspace footprint

More throughput with less power usage
