

University of Bergamo secures segmented networks with Check Point

Check Point Security Gateway Appliances secure multiple networks and protects students and staff from cyber threats

University of Bergamo is an Italian public university, northeast of Milan, and home to 25,000 students

Industry: Education

“There are only two people managing the university’s security. Without Check Point, we couldn’t do our job effectively. Check Point gives us the tools we need to secure our network and spend less time analyzing logs.”

— Andrea Gamba, IT Engineer,
University of Bergamo

Challenge

- Simply management of a large segmented network
- Streamline the end-user network experience

Solution

- Check Point Quantum NGFW
- Check Point Harmony Endpoint

Results

- A single platform to manage multiple networks
- Improved efficiency of security management
