Check Point + Revelstoke
Automate and Accelerate Security

Automated Security Posture with Radically Simple SOAR

SOC teams often struggle to combat sophisticated attacks targeting their environments, especially as cyber threats become more dynamic.

With Revelstoke and Check Point, detection and response workflows are automated and optimized. You can secure your cloud, and empower your team with automated workflows — enabling them to identify threats, disrupt the kill chain, and help strengthen overall security posture.

Revelstoke SOAR, the first high-speed Security Orchestration, Automation and Response platform builton a Unified Data Layer, and Check Point, a firewall industry-leader in preventing cyber threats, are partnering to provide a solution that detects and prevents threats automatically. With our solution, organizations can equip their teams with a unified, cloud-native security platform and the power to unite your data and respond rapidly.

Supercharge your SOC

Revelstoke and Check Point break down silos and respond confidently to the security demands of incident response across your response infrastructure — automatically. This frees analysts to focus on preventing high-priority threats and delivers direct business value to any enterprise.

SOLUTION BENEFITS

- **Automated SecOps and incident response playbooks**
- **Faster detection and true automation for common workflows**
- **Accelerated investigations through integrations**

Automate and Accelerate Your Environments

With this integration, organizations can experience the benefits of each platform. Revelstoke can automate the deployment and configuration of Check Point threat prevention and detection systems, which then continuously monitor networks for suspicious activity. In turn, Check Point alerts can trigger SOC automation back through Revelstoke. It's the complete package! This combination offers teams improved speed of investigations, automated incident response playbooks, and true protection of their environments.

In a tech-savvy world where threats are becoming increasingly more sophisticated and adversaries are discovering new ways to exploit and breach outdated systems — Check Point and Revelstoke bridge the gap between visibility, threat intelligence, and agility. SOC teams can enjoy the best in SecOps.

About Revelstoke

Revelstoke (revelstoke.io) is the only Next Level Security Orchestration, Automation, and Response (SOAR) solution built on a Unified Data Layer that offers no-code automation and low-code customization. Revelstoke empowers CISOs and security analysts to automate analysis, eliminate software development needs, optimize workflows, prevent vendor locks, scale processes, and secure the enterprise.

About Check Point
