

# Managed CNAPP Solution Brief

## Managed CNAPP

Transform your CNAPP platforms with our experienced global Managed Services.

Our team specializes in managing and optimizing platforms like Check Point CloudGuard Network Security, Workload Protection, AppSec, and Threat Intelligence. Other platforms are also supported such as Check Point Harmony Email and Collaboration, Microsoft 365 Defender for Cloud, and other 3rd party vendors.

Our comprehensive managed services scope covers all aspects of your CNAPP Platforms, including: monitoring, configurations, policy tuning, incident management, and troubleshooting, providing a seamless integration with your organization's IT and InfoSec operations.

## Comprehensive Scope Coverage

- 1

Monitoring, Configurations and Policy Tuning
- 2

Incident Handling and Troubleshooting
- 3

Co-authored runbook, communication plan and Ticketing Integration

## Managed CNAAP

---

### Delivery

The first step is to understand the specific needs of the organization. This involves evaluating the current CNAPP requirements, infrastructure, identifying pain points, and determining the organization's goals and budget.

Our team will then work with you to configure and maintain your CNAPP platforms to ensure they are functioning effectively and securely.

#### Network Security

With Cloud Network Security, enterprises are able to macro- and micro-segment their assets across cloud providers and on-premises infrastructure with advanced features such as DoS protection, NGFW, API protection, and SSL/TLS inspection.

#### Enhanced Visibility

Offer a centralized view of the entire application infrastructure, including traffic, components, and configurations.

#### Cloud Workload Protection

Enables true "shift-left" security by integrating with CI/CD pipelines, implementing source code and infrastructure as code (IaC) scanning, and protecting workloads running on virtual machines, containers, and serverless platforms.

#### Cloud Threat Intelligence

Achieves a deeper layer of security and insight with intrusion detection, threat hunting, and remediation. inspection.

## Managed Services
